
Engine diagnosis warning lamp lights up. The fault code (FC)
P0101FA or P0101Fb or P0101FC is logged in the engine control unit.

Topic number	LI07.07-P-058244
Version	5
Design group	07.07 Air flow meter, air mass meter
Date	03-28-2014
Validity	GLK and ML with engine OM 651
Reason for change	damage code update
Reason for block	

Complaint:

Engine lamp on and fault code concerning HFM logged.

Cause:

Air filter cartridge/element slats distorted.

Attachments	
File	Designation
Dichtung verdrückt.JPG	Seal compressed

Remedy:

1. Replace air filter element.

2. Reset HFM drift compensation via menu Adaptations > Teach-in processes > Reset HFM drift compensation values (see file "Reset HFM" in attachment). - End diagnosis and disconnect multiplexer from vehicle. - Keep CAN bus idle for 10 min (ignition key removed, veh. locked). - Connect Star Diagnosis and erase fault code.

If the steps listed above are unsuccessful, then perform the next step.

3. Check HFM power supply pin 2-3 (should be - 5.0V). - Check resistance of signal lines. (wiring diagram in attachment)

4. Check intake system for leaks

The engine control unit must NOT be replaced for this complaint.

Only replace the HFM if the guided test fails and steps 1-4 above has been performed.
